Distributed Systems
Workshop 6: Middleware

Semester II 2026
Oct 22, 2026
Prof. Francisco Hidrobo

Activity 1: Message-Oriented Middleware using RabbitMQ

1. Follow the instructions in the "README.md" file in the **Workshop6-Activities** folder. Run tests and comment results.
2. Compare implementations in C and Python.

Activity 2: Middleware for your project.

- Design the communication architecture for your project.
- Specify the middleware you will use.
- Using that middleware and the architecture you have designed, perform basic functional tests.
- Justify your choice of both the design and the middleware you will use.

Report: You must send a report with the steps, test, results (screenshots) and discussions.
